The diagram illustrates the effect of the `font-variant-ligatures` property on the word "HELLO TypographY." It shows five variations:

- normal**: Shows standard ligatures like 'ff' and 'tt'.
- no-ligatures**: Shows no ligatures, resulting in a more pixelated appearance.
- pos-ligatures**: Shows ligatures defined in a `ligatures` property.
- contextual-ligatures**: Shows ligatures triggered by specific context.
- contextual-no-ligatures**: Shows no ligatures triggered by specific context.

Each variation is shown with its bounding box (dashed red line) and character box (dotted purple line). A character map is also provided, showing the ligature forms for each character.
